

# Recycle with ORBIS and Make Money!

## Avoid sending plastic scrap material to the landfill!

Do you have obsolete or surplus plastic containers, totes, pallets, bulk containers and beverage shells in your facility taking up valuable manufacturing facility or warehouse space?

By design, plastic reusable packaging can be fully recycled into other useful products at the end of its service life. ORBIS is an environmentally conscious company that provides alternatives to the disposal of excess, surplus, damaged or obsolete plastic packaging

ORBIS offers **"Recycle with ORBIS"**, a comprehensive program designed to effectively recover, recycle and reprocess plastic material into other useful products.

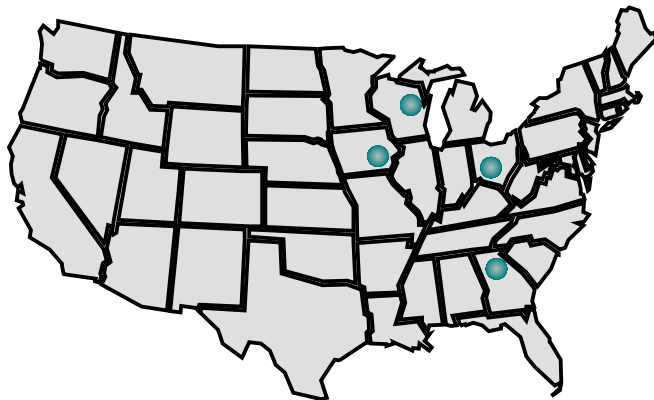

### Nationwide Pick-Up Service

ORBIS accepts material from a wide range of industries:

- Automotive
- Grocery/bakery
- Food processing
- Beverage
- Textile

Typical plastic products include:

- Crates, containers and trays
- Pallets and divider sheets
- Bulk containers
- Purgings
- Stretch film
- Drums

● Recycling Locations

ORBIS recycles polyethylene and polypropylene material. To facilitate the efficient recovery of material, ORBIS can purchase the material or provide credit\* and will work with you to:

- Identify the type and amount of product to be recycled
- Provide a fair market value
- Schedule a convenient pick-up

Visit the **"Recycle with ORBIS"** section of [www.orbiscorporation.com](http://www.orbiscorporation.com) or contact ORBIS today at 920-232-0816.

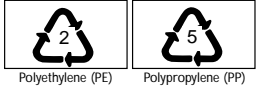

\* Restrictions may apply. Please contact your ORBIS Sales Representative for program requirements.

# Recycle with ORBIS: Frequently Asked Questions

## Q: How does "Recycle with ORBIS" work?

A: This program is designed to effectively recover, recycle and reprocess plastic material into other useful product, at the end of its useful service life. ORBIS will pay in credit against future purchases or make a direct payment.

## Q: What materials/product will ORBIS accept?

A: All High-Density Polyethylene (HDPE) plastic totes, pallets, bulk containers, beverage shells, divider sheets, milk jugs (post industrial), concentrate drums, and numerous other non-packaging HDPE parts. ORBIS will accept all competitive product. If separated from HDPE, ORBIS will buy Polypropylene (PP) material.

## Q: Why is ORBIS interested in this material?

A: ORBIS is an environmentally conscious company and recycling obsolete or surplus plastic is a beneficial way to reuse resources. Recovery and recycling prevents it from entering the solid waste stream. ORBIS plastic reusable packaging can be fully recycled into other useful products at the end of its initial service life, reducing the need for landfilling.

Furthermore, the cost of the raw materials required to manufacture plastic reusable packaging products has increased to record levels. Despite this, ORBIS is committed to keeping costs to our customers as competitive as possible. Utilizing recycled material in the manufacturing process allows ORBIS to continue to offer customers quality products at competitive prices.

## Q: What quantities will ORBIS accept?

A: Preferably in truckload (TL) quantities to reduce freight. Less-than-truckload (LTL) quantities will be considered. Depending on the type of product, a TL may range from a net weight of 6,000-25,000 pounds.

To protect our employees from exposure to hazardous materials, ORBIS reserves the right to return a shipment of material for any justifiable reason.

## Q: What is the process for returning material?

A: It is very simple. Simply contact Tom Stark at ORBIS (920-232-0816) and a Return Authorization will be generated (usually same day). Also, we can work with you to schedule a pick-up, if necessary. The material will be sent to ORBIS' nearest recycling location to optimize freight.

## Q: How much will ORBIS pay for a truckload of material?

A: Credit is based on a per pound basis and will fluctuate depending on market conditions and type of material. For example, if the credit per pound is \$.10 - \$.20, a truckload of material weighing 20,000 pounds would generate a direct credit or payment of **\$2,000 - \$4,000**. Please call for current market pricing.

## Q: How will I receive credit or payment for the material returned?

A: ORBIS will weigh the material when it arrives at our recycling location, and issue a credit or direct payment to you, based on an agreed upon price per pound.

## Q: Are there any material quality concerns?

A: All scrap is inspected upon receipt. Submitted material should be reasonably clean and free from:

- Any hazardous material
- Contaminants such as grease or oil
- Heavy amounts of dirt, debris and labels

ORBIS may request a representative sample for testing prior to the return of larger quantities.

## Q: Who can I contact for additional information about "Recycle with ORBIS"?
