

# Container Identification Options & Accessories

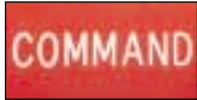

Automotive Components ■ Bearings ■ Hardware ■ Industrial Equipment  
 ■ Metal Parts ■ Plastics and Rubber ■ Electronics ■ Tools

A variety of options and accessories are available for ORBIS containers to increase their efficiency in your material handling system. Many of the identification options facilitate the use of bar code scanning in today's automated warehousing systems.

NOTE: Not all options are applicable for all containers. Contact your ORBIS representative for more details on availability, minimum order quantities, lead times and set-up charges. Nominal specifications subject to changes without notice.

## Identification Options

Loose Letter Hot Stamp identification allows for 1" capital letters in a pre-defined area on the container.

Sequential Numbering Hot Stamp is available with each character limited to a 1/2" height and 5 characters per line. The requirements for the area and location for sequential numbering varies for each container.

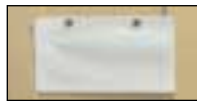

Customized Hot Stamp is needed if the number of letters exceeds available space. The original artwork must be supplied to ORBIS at the time of the order. Size and available location of the hot stamp will vary for each container. Minimum shipment is required. Stocked Colors: White, Black, Blue, Red, Orange, Yellow and Green. There is a set-up charge for unstocked colors.

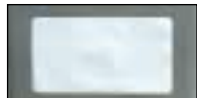

Molded-In Identification constitutes any type of permanent identification that is molded into the product or the product cover. Original artwork must be supplied to ORBIS at the time of the order. The requirements for the area and location of the molded-in identification vary for each container. Minimum manufacturing quantities required.

Clip is a spring steel clip that affixes to a container to hold order or shipping documentation. This cost-efficient option is ideal for containers in a conveying environment.

Snap-On Cardholders are available in 1-snap or 2-snap versions, attach to optional, pre-installed snaps on container, and are ideal for securing shipping and order documents. These easily removable cardholders allow for greater flexibility in product storage and transport. Replacement snaps available (Stud and Eyelet Set).

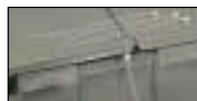

Adhesive Cardholders these clear, envelope-style cardholders have adhesive backing, are available in several sizes, and are easy to apply to many surfaces. The use of these cardholders increases inventory accuracy by facilitating easy bar code scanning in many types of automated systems.

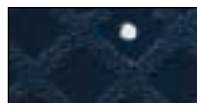

### Cardholders

Model	Outside Dimensions (in.)	
	Height	Length
CH10 - Adhesive	4.25	7.75
CH10 - 2 Snap	4.25	7.75
CH12 - 1 Snap	4.25	7.50
CH14 - Adhesive	3.50	4.25
CH14 - 2 Snap	3.50	4.25
CH16 - Notched Adhesive	4.50	7.00
CH20 - 2 Snap	2.25	6.50
CH10LS - 2 Snap	4.25	7.75
CH20LS - 2 Snap	2.25	6.50
CHV73-NFV2 - Adhesive	7.80	3.30
Clip, 2 Hole - Cardholder	0.50	1.75
Clip, CHSO - Spring	0.75	3.32

## Identification Options and Accessories

Standard Security Ties, removable by cutting, provide product protection and security in storage and transport.

Hole Patterns can be molded in or drilled for many ORBIS containers, allowing for increased ventilation and drainage.

Heavy Duty Dollies are available in many sizes to move containers quickly, easily and safely throughout your facility.

# Colors

Hand-Held Containers ■ Bulk Containers ■ Pallets

The colors listed on these pages are standard colors for high-density polyethylene (HDPE). Products molded in polypropylene (PP) or other materials may require a different colorant to resemble these colors. Please contact your ORBIS Sales Representative for additional information.

These colors do not represent stocked finished products, rather standard colorants that are available.

Other colors are available, however minimum order quantities, set-up charges or other special requirements may apply. Please contact your ORBIS Sales Representative for additional information.

Orders requiring FDA compliant colorant and material need to be specified at the time of quotation and order to guarantee FDA materials are used in the manufacturing process.

UV-protective colorants are available upon request. Please contact your ORBIS Sales Representative for additional information.

Exact color match to a specific color reference number is not guaranteed, nor is this printed color reference sheet guaranteed for color match exactness. Please request a representative color chip should more specific color information be necessary.

### Hand-Held Containers\*

\*Not all containers manufactured with FDA colorant are FDA compliant. Please contact your ORBIS Sales Representative for additional information.
