

FliPak® Containers

Health and Beauty Care Products ■ Consumer Packaged Goods ■
Metal Parts ■ Bakery Items ■ Snack Goods ■ Meat/Poultry

The FliPak family offers more than 20 container sizes with attached hinged covers that prevent expensive loss of product. These containers stack when closed or nest when open to provide the most efficient use of available space on the manufacturing floor, in the warehouse, inside a truck trailer or in the back room of your retail outlet.

Reusable for over 250 trips, FliPak containers provide an excellent return on investment. Markets include health and beauty aides, pharmaceuticals, general merchandise, soft goods, fasteners, jewelry, office products, tapes and CD's, automotive parts, tobacco products, and packaged grocery items. Multiple accessories and identification options are available, such as hot stamping, card holders, placards, and dollies. (See page 113.)

Highly Efficient Nest Ratios

The efficient nest ratio of FliPak containers saves storage space and return freight costs. In these examples, when 4 containers are nested, the height is doubled because the additional containers are the same height as the bottom container.

- >> Select sizes (see chart) available in clear polypropylene for easy content identification.
- >> 1/4" or 3/8" diameter reinforced security holes are compatible with a variety of tote closures, from ties to padlocks.
- >> 21" x 15" containers compatible with select pallets. Please see the Pallet Compatibility Chart on page 83.
- >> Select versions have metal or plastic hinge for covers.

FiiPak® Specifications All dimensions in inches, unless specified.
