

# FliPak® Containers

FP03, FP06, FP075, FP145

Healthy and Beauty Care Items ■ Pharmaceutical Products ■ Food

The FliPak FP03 and FP075 were designed to allow flat strapping across the cover and against the sides for secure strapping. The closed pocket handgrip limits product loss and provides convenient grasp and release. The FP03 stacks sixteen up on a 48" x 40" pallet, and the FP075 stacks eight up on the same pallet. The FP06 and FP145 provide a safe, stable load on wide,

over-the-road trailers so that six containers fit across when floor loaded (FP145 only). The .110" wall thickness provides maximum product protection while the pebble grain bottom provides excellent conveyor traction to integrate with automated material handling equipment and all types of conveyors. Multiple identification options or accessories available. (See page 113.)

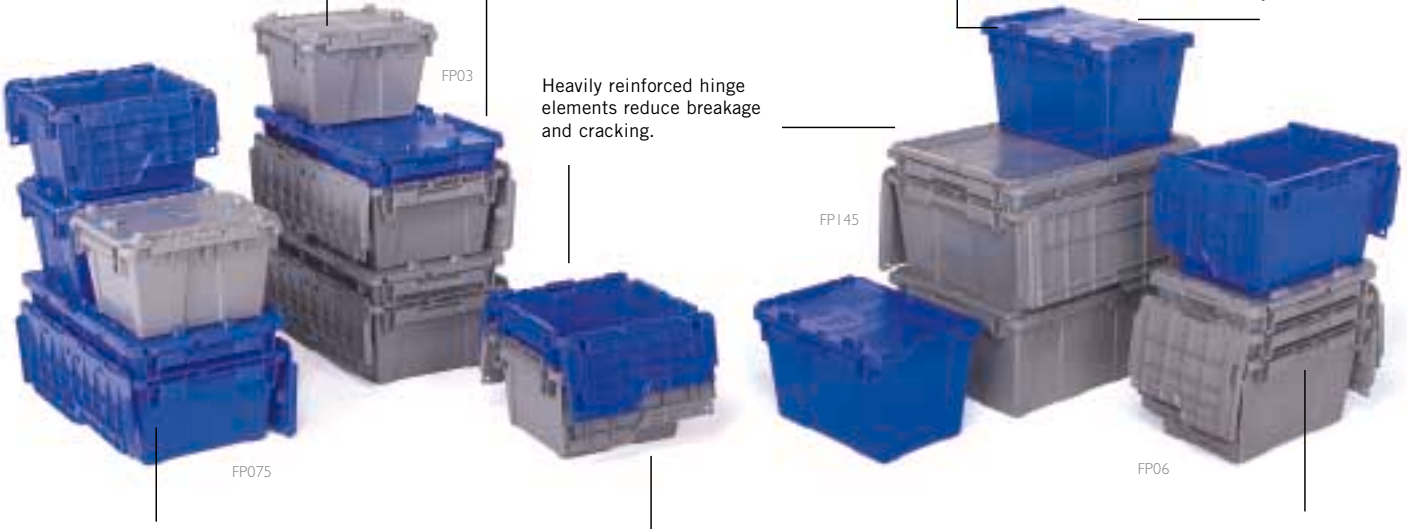

Quick-release label area on attached hinged cover and ends for easy reading and quick label exchange.

Cover recessed within the perimeter of container to protect against cover breakage while conveyed or shipped.

Two "stack stops" available on standard version. Four "stack stops" can be custom ordered.

Reinforced security hole for added strength when using plastic security ties.

Heavily reinforced hinge elements reduce breakage and cracking.

Block nest stops provide extra nesting strength to reduce breakage. Visible area above nest stops for easy reading of sequential number when nest-ed or stacked.

Pebble-grain bottom surface provides excellent conveyor traction.

Closed pocket handgrip limits product loss and provides convenient grasp and release.

Modular System: Side by side two FP06's will stack on or nest inside a FP142 or FP182 (See page 36). FP142, FP145 and FP182 will stack on two FP06's.

**Specifications** All dimensions in inches unless specified.

# FliPak® Containers

FP07, FP08, FP102, FP13, FP142, FP182

Healthy and Beauty Care Items ■ Pharmaceutical Products ■ Food

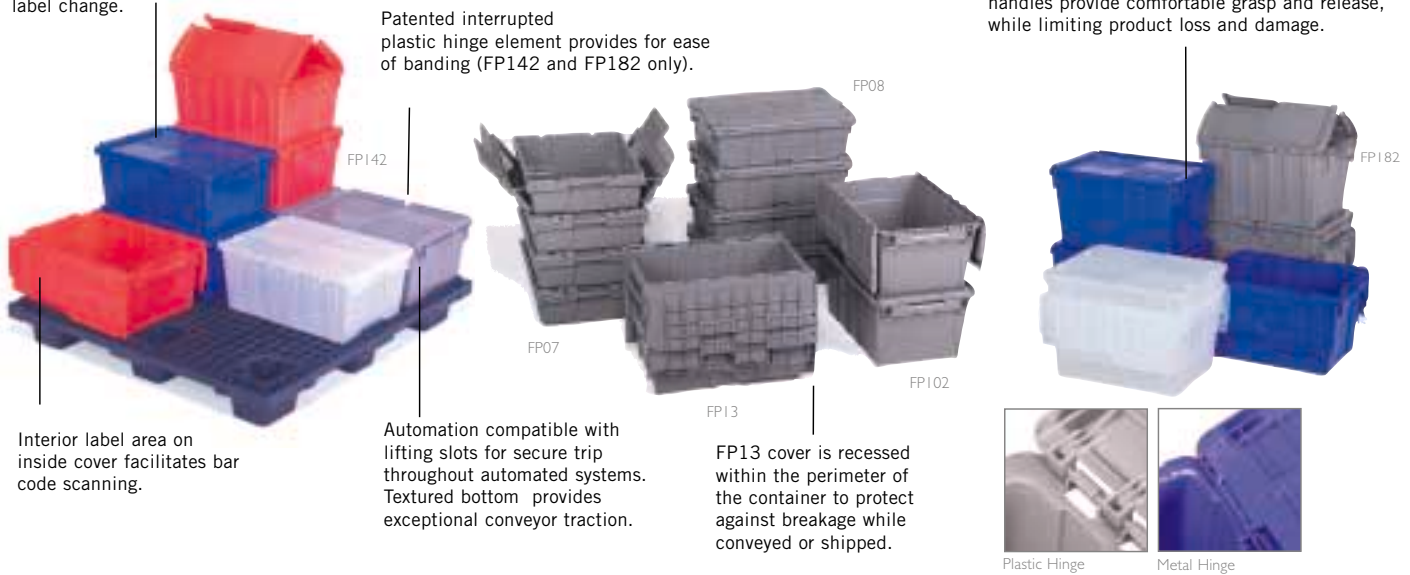

FliPak® containers are used heavily in distribution applications such as health and beauty aids, pharmaceuticals, grocery and general merchandise. These containers stack five up on a 48" x 40" pallet and six up on a 45" x 48" pallet (See Pallet Compatibility Chart on page 83). These FliPaks are used in interplant transfer of parts and assemblies for JIT systems, health and beauty aide distribution, high-security retail and general merchandise applications. The pebble-grain bottom provides

exceptional conveyor traction and easy integration with automated material handling systems. They stack when full, nest when empty for optimum space utilization. The container design allows flat strapping across cover and sides for secure strapping, and has a .125" wall thickness for long life. Patented plastic hinge element on the FP142, FP182 and FP102 makes container 100% recyclable. Multiple identification options or accessories available. (See page 113.)

Quick-release label area on attached hinged cover and side and edge of container allows for multiple identification areas and fast label change.

Patented interrupted plastic hinge provides for ease of banding (FP142 and FP182 only).

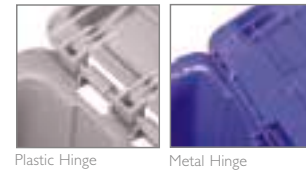

Optional document slot allows documents to be added to a closed container. Improved pocket handles provide comfortable grasp and release, while limiting product loss and damage.

Interior label area on inside cover facilitates bar code scanning.

Automation compatible with lifting slots for secure trip throughout automated systems. Textured bottom provides exceptional conveyor traction.

FP13 cover is recessed within the perimeter of the container to protect against breakage while conveyed or shipped.

Plastic Hinge Metal Hinge
