

FliPak® Containers

FP19, FP22, FP242, FP261

Healthy and Beauty Care Items ■ Pharmaceutical Products ■ Food

The FP19 and FP261 are attached-lid containers made from injection-molded, high-density polyethylene and are used in product distribution and transfer applications. The pebble-grain bottom provides excellent conveyor traction that integrates well with automated material handling equipment and many types of conveyors. The FP19 stacks five up on a 48" x 40" pallet and has an optional robotic auto-lift area in the container rim. The FP261 stacks four up on a 40" x 48" pallet. See Pallet

Compatibility Chart on page 83. Reusable and versatile, these containers nest when covers are open and interstack when closed. The FP242 offers features to improve your material handling system such as drain holes, optional plastic hinge element, interior label area and document slot. Interrupted hinge on FP242 plastic hinge container allows for ease of banding for secure stacking, loading and transport. Multiple identification options and accessories available. (See page 113.)

Recessed cover for secure stacking with block nest stops to provide superior nesting strength.

Container endwall area accepts a document pouch for paperwork after container is closed.

1" X 2" area next to nest stops for sequential numbering that is visible when containers are stacked.

Heavily reinforced hinge elements reduce breaking and cracking.

Reinforced security hole on covers for added strength when using plastic security ties.

Containers nest when open and interstack when covers are closed to integrate with other material handling equipment.

Quick release label area on attached hinged cover and container ends for easy reading and quick label change.

Closed pocket handgrip limits product loss and provides convenient grasp and release.

FP261 on DGS60100 Also works on single dolly (DGS6050). See dolly specifications on page 28.

FP261 available with notches for rods that hold hanging folders to meet a wide variety of document management needs. Rods included on FPR261.

Specifications All dimensions in inches unless specified.

* Special trailer width required for FP242 containers, contact your ORBIS sales representative for more details.
 (P) Patented plastic hinge (Note: All other FliPak containers manufactured with metal hinge.)

FliPak® Containers

FP151, FP30, FP32, FP38, FP402, FP60

Healthy and Beauty Care Items ■ Pharmaceutical Products ■ Food

These FliPaks offer large internal capacity for easy handling and carrying in general purpose storage and distribution applications. The attached, hinged covers are designed to allow strapping while the pebble grain bottom provides increased conveyor traction. The FP38 and FP60 have heavy-duty .125" thick walls for maximum product protection and a longer container life. The FP402 features automation compatible lifting slots, interrupted hinge for ease of banding, interior label area, drain holes in handles, improved pocket handles, and optional

document slot for insertion of documents after the container is closed. These FliPaks are used in the distribution of pharmaceutical, general merchandise, health and beauty care and hardware items. The FP151 comes with a pebble grain bottom that provides excellent conveyor traction and the FP32 has a smooth bottom for easy transport. The heavy duty .120" wall thickness ensures protection of your product (FP32). Multiple identification options and accessories available. (See page 113.)
