DFP243 Dolly

Introducing the new DFP243 dolly for use with FliPak® containers from ORBIS.

These rugged dollies were designed to increase container moving efficiency in many applications. High corner supports securely hold FliPaks in place reducing movement and shifting while in transit. The all-plastic construction eliminates sharp corners found in comparable steel dollies, increasing employee safety and reducing product damage. The DFP243 dolly is compatible with common FliPak® container sizes, eliminating the need for multiple dollies to accommodate each container size.

BENEFITS

- Compatible with FP242, FP243, FP402 and FPN402 FliPaks
- High corner supports hold totes in place
- Easily transports multiple FliPak® containers
- Dollies securely stack together
- Easily cleanable
- Durable, double wall construction increases service life
- Rugged rubber casters withstand varying ground surfaces
