PRODUCT APPLICATION SHEET

40 x 48 StakCap Top Cap

The new ORBIS 40 x 48 StakCap® Top Cap allows double stacking of stackable and rackable pallet loads.

It is designed to secure 40" x 48" pallet loads for easier and more efficient material handling while enhancing the safety and maneuverability of double stacked pallets.

Plastic reusable top caps secure container loads to maintain uniform weight distribution and stability when in storage or transit. When the new 40" x 48" StakCap is combined with the ORBIS 40" x 48" StackR® or Heavy-Duty Structo-Cell® (HDSC) Pallets, economic and efficient unit loads are created. With the StakCap, pallet loads can be securely double stacked for greater cube utilization and increased floor space in plants and trailers. Its low-profile design allows for a high nesting ratio, creating more floor space on plant, storage and trailer floor.

The 40" x 48" StakCap is a single sheet thermoformed (HMWPE) top cap. The geometry of the StakCap allows the top cap to be used with ORBIS 24" x 20" and 24" x 16" totes.

The StakCap can be fully recycled at the end of its service life.

BENEFITS

- Load stability by interlocking with legs of the ORBIS 40" x 48" StackR® and HDSC pallets
- Full cleanability, with 100% draining capabilities
- Easy and secure strapping with molded-in channels for banding
- Low profile design enables high nesting ratio in storage
