## PRODUCT APPLICATION SHEET

# 40 x 48 RCKO Plastic Fire Retardant Pallet - ORBIS

Now made with Proliant™!

The 40 x 48 FM RackoCell® pallet offers improved hygiene, durability, strength and stackability, while outperforming alternative pallets, resulting in a lower cost-per-trip. ORBIS developed Proliant, a fire-retardant plastic material for use in its fire-retardant pallets. It is approved by Factory Mutual Research Corporation (FM) in meeting fire rating requirements equivalent to wood pallets. These pallets are traditionally known to meet Factory Mutual Insurance standards for commodity classification of idle plastic pallets and NFPA 13/2000 requirements. Along with FM approval, Proliant is also FDA compliant, providing the necessary compliance for food and beverage processors that require fire-retardant pallet solution for their plants. Proliant is a halogen- and bromine-free material that is fully recyclable. ORBIS offers the largest selection of fire-retardant plastic pallets approved by Factory Mutual Research Corporation (FM) as meeting fire rating requirements equivalent to wood pallets.

## BENEFITS

- Halogen-free, Bromine-free
- Fully hygienic design
- One-piece construction
- Structural foam molded
- Optional fork tine grommets (qty: 8) and four outer post grommets
- Fork Truck Entry: 4-way; Hand Truck Entry: 4-way
