PRODUCT APPLICATION SHEET

24 x 24 Modular POP Pallet

ORBIS' all-plastic 24" 24" Modular POP Pallet accommodates a wide range of quarter size POP displays and structures.

These pallets offers marketers an attractive display solution with efficient material handling, easily creating in-aisle or end-of-aisle displays, specifically in small-format retail environments.

The flat, smooth surface allows for easy set up in a warehouse or co-packing facility. Once pallets arrive at the retailer, they can be moved directly to sales floor reducing labor costs and maximizing storage space. The non-porous plastic construction enables easy floor cleaning and handling within the retail environment. Contoured corners won't damage product loads and are shopper-friendly. The heavy duty, solid body construction accommodates a variety of load sizes and weights.

BENEFITS

- Decreases safety liabilities and product shrink by eliminating sharp edges, splinters and nails found in wood alternatives
- Maximize labor efficiency and reduce product stockouts
- Protect promotional and general product displays from floor dirt, debris and moisture
- Reduce packaging waste by eliminating wood pallet disposal
