PRODUCT APPLICATION SHEET

45 x 48 MP3 TOPCAP CISC

The MP3 Top Cap can be added to 45" x 48" container loads to protect product from dust and contaminants during storage and shipment.

It also acts as a cover for ORBIS bulk containers. (sold separately) Adds system flexibility by allowing mixed shipments of containers loads and bulk containers. With industry-leading compatability between nestable pallets, bulk containers and racks*, this top cap reduces freight costs for suppliers throughout the automotive and industrial supply chains. With mixed product loads, suppliers are able to fill each position on outbound trucks and reduce the number of partial loads leaving their facility. Weighing just 16.6 lbs, the MP3 Top Cap is 100% recyclable at the end of its service life. (*Note Due to the lack of standardization in rack footprints, rack compatibility needs to be tested prior to implementation. Please work with your ORBIS Sales Representative.)

BENEFITS

- 45" x 48" x 2.9" footprint
- Fits securely on 45" x 48" container loads
- Structural-channel molded in high-density polyethylene
