# New XpressBulk® Merchandising Trays Improve Merchandise Delivery and Replenishment

**Simplify distribution supply chains and improve labor efficiency with new XpressBulk® Merchandising Trays for retail-ready displays.**

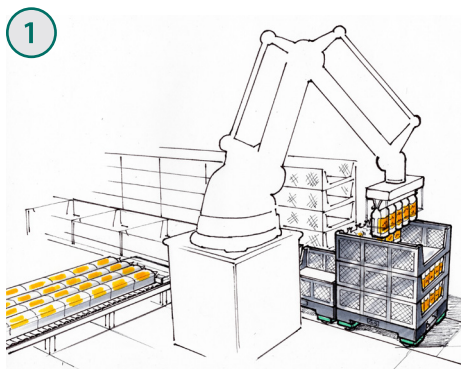

ORBIS' XpressBulk Merchandising Trays are a retail-ready shelved display and a sustainable, efficient replacement for the manual replenishment process. XpressBulk offers several material handling benefits:

- Delivery efficiency with fast, easy transfer of product from the truck directly to store floor
- Reduced product touches for improved store labor efficiency and on-shelf availability for customers
- Eliminate labor intensive manual shelf replenishment process
- Sustainable replacement for cardboard boxed merchandise
- Improved associate safety by eliminating the need for box cutters

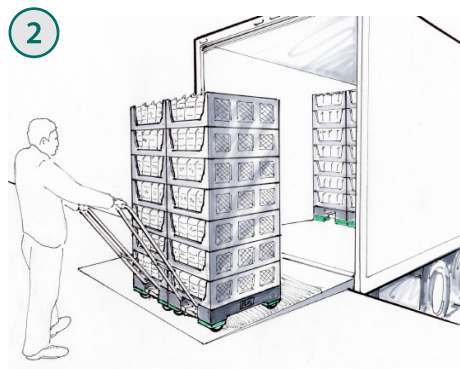

## Streamline Retail Distribution

XpressBulk Merchandising Trays simplify retail distribution and is integrated immediately at the production facility through to the store floor.

1 Pack merchandise directly into trays. Stack trays on a pallet for easy transportation.

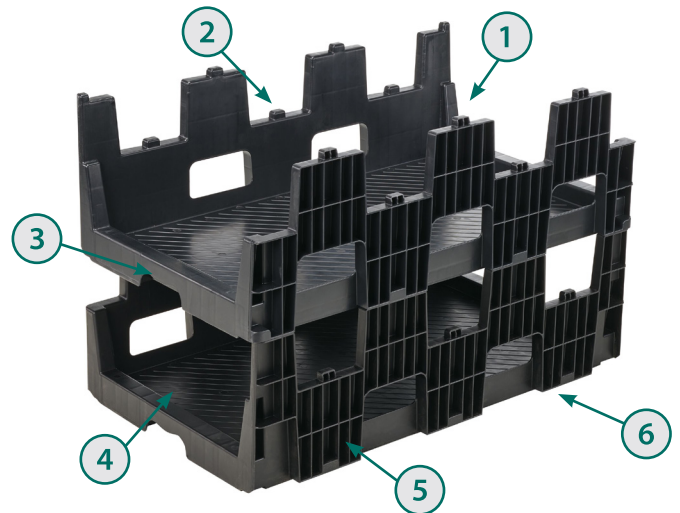

2 Load onto a truck. Utilize wheeled PALLY® for fast loading and unloading.

3 Place loads on retail floor for easy replenishment. Customers shop directly from trays.

## Key Features

- 1/ 180° stack-and-nest design increases storage capacity and offers two-way usage for versatile material handling and easy picking
- 2/ Locking, stacking feature stabilizes tray stacks for safe, dynamic movement
- 3/ Comfortable hand holds for manual handling and are accessible when stacked or nested
- 4/ Flat, solid inside deck offers usage in multiple product categories
- 5/ Dimensional consistency of plastic tray is optimized for automation
- 6/ Industry standard 40x24 footprint is compatible with 40x48 pallets or 1000x600mm PALLY
