NEW 40 x 48 Odyssey® Low Profile Pallet Streamlines Automation and Integrates with Existing Pallet Pools

The efficient handling of palletized product in automated systems is key to building an effective, economical and sustainable supply chain.

The new 40 x 48 Odyssey Low Profile (LP) pallet is a dimensionally consistent, reusable pallet designed to provide repeatable performance with automated equipment. With the same stability and unique features of the original 40x48 Odyssey pallet, the new low profile 5.6-inch height aims to bring the added benefit of seamlessly integrating with alternate pallets in existing pallet pools.

This pallet is a robust solution that improves load stability with steel reinforcements and molded-in frictional elements to minimize load shifting, product load damage and pallet slippage off fork equipment. Designed to carry edge racked loads of more than 2,800 pounds, it is also equipped with comfortable handholds for easy manual handling. The pallet's flow-through hygienic design affords easy cleanability and its plastic construction ensures dimensional consistency for repeatable, reliable performance with automated equipment.

This Odyssey LP pallet features smooth, plastic surfaces that are free of nails and splinters, protecting product loads and minimizing equipment downtime due to warehouse debris.

- **Compatible** - Seamlessly integrates with wood block pallets
- **Automation-friendly** - Precisely molded for use in automated systems
- **Truckload efficiency** - Low profile height maximizes truckload space
- **Load stability** - Permanent, molded-in frictional elements minimize load shifting and do not damage product loads
- **Impact resistant** - Robust and highly resistant to impact from equipment, ideal for rugged applications
- **Hygienic** - Flow-through, hygienic design for easy cleanability

ORBIS' latest innovation builds on the success of decades of pallet innovation, from materials to design. **Contact ORBIS today to learn more.**

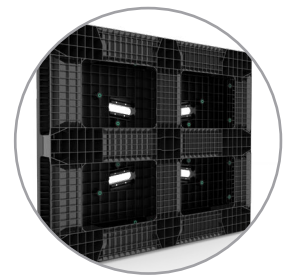

Minimize load shifting with optional molded-in frictional elements*

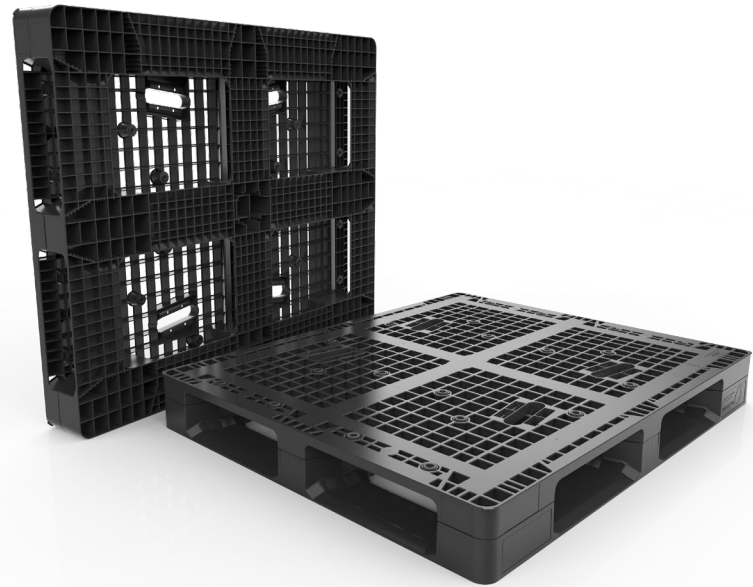

Smooth surfaces do not damage product

Low profile 5.6" pallet height maximizes truckload quantities

Seamless conveyance with full stringer bottom

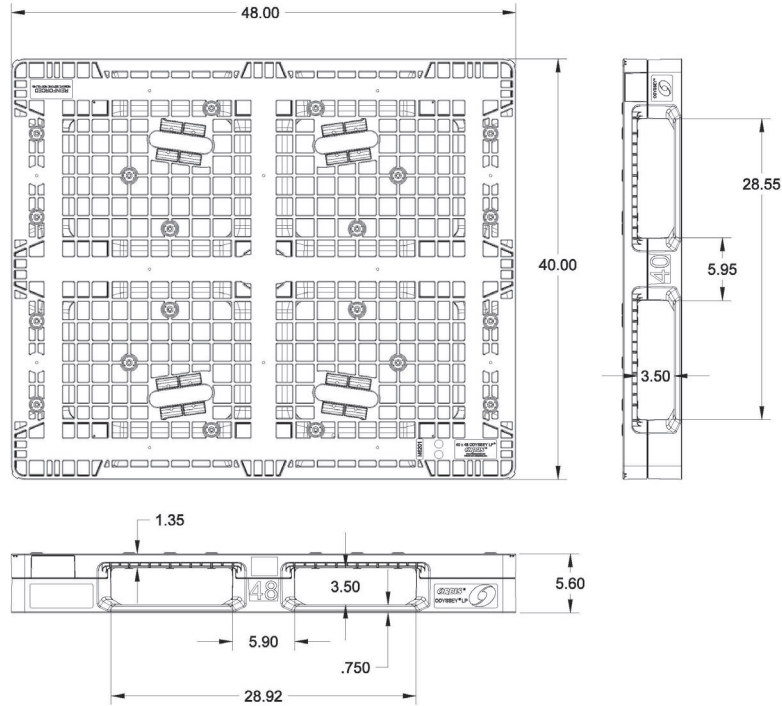

Odyssey Applications

- Club store shipments
- General food processing, including cold and frozen storage of meat, bakery, produce and dairy
- Dry goods, including apparel, pharmaceuticals and other consumer packaged goods
- Agriculture, including seed and farm materials

*Frictional elements are offered in black only and modeled in green solely for illustration.

NEW 40 x 48 Odyssey Low Profile Pallet Streamlines Automation and Integrates with Existing Pallet Pools

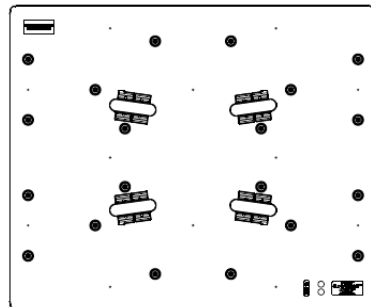

Specifications (Upper Dimensions: English, Lower Dimensions: Metric)

Model*	Dimensions (in/mm)			Weight (lbs/kg)	Load Capacity (lbs/kg)		Rack Rating (lbs/kg)		40' Truckload Quantity	53' Truckload Quantity*
	L	W	H		Static	Dynamic	Selective/Edge	Decking/Center		
40 x 48 Odyssey LP Pallet	48.0 1219	40.0 1016	5.6 142	54.0 24.5	30,000 13608	6,000 2722	2,800 1270	6,000 2722	378	570

Feature options include:

- Frictional elements
- Molded logos
- Hot stamps
- Track and trace
